EDUCATION

Carnegie Mellon University

Bachelor of Science in Information Systems

Class of 2021 Pittsburgh, PA

Additional Major in Human-Computer Interaction

Minor in Computer Science

GPA: 3.76/4.0

Dean's List: 2017 - present

SKILLS

Programming

JavaScript, Python, Ruby, C ●●●●●
Standard ML, C++, R, SQL, HTML & CSS ●●●●○

Tools & Frameworks

Ruby on Rails, React, Redux, Linux, Git ●●●●●
OpenCV, Django, Flask, Scikit-learn, Vim ●●●●○
Node.js, MySQL, Pandas, Firebase, Algolia ●●●○○

HONORS & AWARDS

- GoDaddy Intern Hackathon – Best Customer Innovation Hack
- Hack112 (CMU) – Best OpenCV Hack
- Margaret Williams Mathematics Prize
- Scholastic Art & Writing Awards – Two Gold Keys

LEADERSHIP

- Lambda Sigma National Honor Society – Vice President
- Idea to Startup (CMU) – Organizer & Mentor
- Undergraduate Entrepreneurship Association (CMU) – Executive Board Member

TEACHING

15-110: Principles of Computing

Teaching Assistant

Sept 2018 – Dec 2018

- Taught introductory CS concepts, programming in Python and Assembly, data structures and algorithms, and abstractions in computing, under Professor David Kosbie and Mark Stehlik.
- Hosted office hours, recitations, and small group sessions.

15-112: Fundamentals of Programming

Peer Tutor

Jan 2018 – May 2018

- Conducted tutoring sessions on weekly basis to help students with assignments and term projects.

EXPERIENCE

Software Engineering Intern

GoDaddy

May 2019 – Aug 2019 Sunnyvale, CA

- Redesigned shipping configuration flow for GoDaddy's Online Store, improving product level shipping selections for merchants – React, Ruby on Rails, MySQL.
- Implemented shipping related features, allowing merchants to notify customers when local orders are ready for pickup.

Software Engineering Intern

Vezzy for Emory

May 2018 – Aug 2018 Atlanta, GA

- Led development of Vezzy, a marketplace app for Emory University with over 1.7k downloads - React Native, Firebase, Algolia.
- Resolved performance issues and implemented features such as Geo-location Search prior to launch.

PROJECTS

GoDaddy Intern Hackathon Summer 2019

- Created a domains leakage visualization panel combining GoDaddy's cart data from domains search with Zone-file data of recently added domains to a TLD (.com, .org, etc.) to analyze cart leakage information.
- Cataloged and identified possible leakage sources to achieve better regional domain pricing - SQL, Python, Flask, React.js, Highcharts.

Cartpal Spring 2019

- Designed and developed Cartpal, an iOS app digitizing brick-and-mortar shopping experience by aggregating user data from shared shopping lists - React Native, Pandas, Scikit-learn, Firebase.

PyBookLib Fall 2018

- Developed a smart book recommendation web app, suggesting reading lists to users based on categories and ratings of previously read books – Flask, Scikit-learn, NumPy.

StackJump Spring 2018

- Created a StackJump game using Pygame with a smart AI bot learning to auto-jump over incoming obstacles by adapting its jump timing – Pygame, Tkinter.

PySnap Spring 2018

- Constructed a light-weight image processing program with built-in filters – OpenCV, Pillow, Tkinter.
