Education

Carnegie Mellon University
Bachelor of Science in Information Systems
Pursuing double major in Computer Science
GPA: 3.92/4.0, class of 2021
Dean's List, High Honors: 2017-present

Skills

Programming
Python, Java, C, JavaScript, SQL, R, MATLAB

Tools & Frameworks
ReactJS, React Native, Firebase
Flask, Django, Scikit-learn, Pandas
HTML5/CSS3, Bootstrap, jQuery
Vim, Linux, Git/Heroku, LaTeX

Product Design
Balsamiq, Framer, Sketch, InVision, InDesign

Awards

- Hack112 – Best OpenCV Hack
- Margaret Williams Mathematics Prize
- Scholastics Art and Writing Award
  – Two Gold & One Silver Keys

Leadership

- Lambda Sigma National Honor Society
  – Vice President of Public Relations
- Idea to Startup
  – Organizer & Mentor
- CMU Sports Analytics Club
  – Executive Board Member
- Undergraduate Entrepreneurship Association
  – Executive Board Member

Experience

Vezzy for Emory
Mobile Development Intern *Summer 2018 - present*

- Developed a buy & sell app made exclusively for college students using React Native and Google Firebase.
- Identified and resolved multiple performance and scalability issues prior to launch.

FetchMi
Software Developer *Summer 2017*

- Implemented and maintained FetchMi.com with React, JavaScript, CSS, and HTML.
- Led product and design team to build new features such as FetchMi business cards, messaging system, and services comparison page.

Projects

Cartpal *Spring 2018 - present*

- Designed and developed an app digitizing the brick-and-mortar shopping experience by aggregating user data from shared shopping lists.

PyBookLib *Fall 2018*

- Developed a smart book recommendation web app using Flask, Sklearn, and NumPy.

StackJump *Spring 2018*

- Designed and developed a StackJump game using Pygame with a smart AI that learns to auto jump by adapting its jump timing to incoming obstacles.

PySnap *Fall 2017*

- Developed a light-weight image processing program with built-in filters using OpenCV, Pillow, NumPy, and Tkinter.

Teaching

15-110: Principles of Computing
Computer Science Teaching Assistant *Fall 2018 - present*

- Teach 300+ students Python, programming constructs, data structures, abstraction in computing and computational principles in problem-solving.
- Work closely with Prof. David Kosbie and Prof. Mark Stehlik on team homework and recitation plans.

15-112: Fundamentals of Programming
Peer Tutor *Spring 2018*

- Conducted tutoring sessions on weekly basis to help struggling students with assignments and term projects.
